NAREK KOLYAN

SENIOR FRONTEND ENGINEER

PROFILE

Senior Frontend Engineer with 6+ years of experience building scalable web and mobile applications using React, TypeScript, and modern frontend architectures. Specialized in headless e-commerce, GraphQL data layers, and performance optimization for high-traffic applications. Experienced in modular UI systems, React Native, and delivering maintainable, scalable products.

KEY ENGINEERING ACHIEVEMENTS

- Designed modular React architecture and scalable frontend systems for high-traffic applications
- Implemented GraphQL data layers and optimized data fetching for complex product and analytics UIs
- Built headless Shopify storefronts and custom checkout flows for large-scale e-commerce
- Developed AI-powered media generation workflows integrating multiple APIs and async processing
- Shipped cross-platform React Native apps with BLE, health integrations, and OTA updates
- Migrated state management to scalable solutions and improved UI performance across dashboards

ENGINEERING PRINCIPLES

- Write maintainable, modular code
- Optimize performance before scaling infrastructure
- Prefer simple architectures over complex abstractions

EDUCATION

Bachelor's Degree in Agriculture Marketing & Business (Sep 2018 – Jun 2022)

Armenian National Agrarian University

Yerevan, Armenia

SELECTED PROJECTS

Accounting Company Website

My first project - still in use today. Multi-language web application for accounting services in Armenia. Features canvas forms and form-to-email functionality. Built with modern React stack.

Cryptocurrency Admin Panel

Admin panel for cryptocurrency exchange and statistics. Built for a Ukrainian company. Features real-time crypto exchange rates, trading statistics, and comprehensive admin dashboard. Frontend development only.

Mobile E-commerce Solution

Ready-to-use mobile shopping apps for 100+ brands across Russia, UK, and US. 5+ analytics variants, custom backend, Shopify integration. Fullstack role (React, React Native, Node.js) in 40+ team.

RV Rental Platform

Built headless Shopify storefront serving thousands of products with optimized GraphQL queries and scalable UI architecture. US-based RV rental platform with custom checkout and campground booking. Worked as React developer on multiple rental projects.
